### Hip Score

A hip score is a measure of evidence of hip dysplasia (abnormal development). Scores for each hip are added together to get an overall hip score for a dog. Scores range from 0 to 106, with the lower the score the better. The advice to breeders is to ideally breed only from dogs which score below the breed average.

| Test          | Result   | Date            | Age             |
|---------------|----------|-----------------|-----------------|
| Hip Dysplasia | 6/6 = 12 | 23rd March 2012 | 1 year, 1 month |
